

Conference on Mechanotransduction of Host-Pathogen Interactions

December 17th, 2018

Auditorium Biopark
11, rue Watt
Paris 13^e, France

Speakers:

Patricia BASSEREAU
Pierre BUFFET
Guillaume DUMENIL
Markus ENGSTLER
Friedrich FRISCHKNECHT
Anne-Marie KRACHLER
Khalid SALAITA
Isabelle TARDIEUX

Organizers:

Anne HOUDUSSE
Evelyne JOUVIN-MARCHE
René-Marc MEGE
Isabelle TARDIEUX
Guy TRAN-VAN-NHIEU

The parasite *Toxoplasma gondii* multiplies as rosettes of polarized progeny within human host cells. The apex of the progeny is stained in white and the host cell microtubule network is detected in green while both parasite and host cell nuclei are visible in red.

Free but compulsory registration on:
